

# Schlumberger Built Their Award-Winning Information Security System With Key Support From...

...ST Systems-on-Silicon.

When Schlumberger, the leading provider of smartcard-based solutions worldwide, wanted access to leading-edge microchip technology for their award-winning innovative smartcard-based transactions solutions with enhanced security features, who did they turn to?

Who else but ST the world leader in chips for smartcards.

STMicroelectronics has been a leading supplier of smartcard chips for over 15 years and has been recognized as one of the world's leading suppliers. ST's strong emphasis in security, a unique and proprietary non-volatile memory technology and worldwide manufacturing facilities give it a real edge as a technology design partner for most digital transaction applications.
